

BS in Electrical Engineering (393550) MAP Sheet

Engineering, Electrical and Computer Engineering

For students entering the degree program during the 2019-2020 curricular year.

University Core and Graduation Requirements				Suggested Sequence of Courses			
University Core Requirements:				FRESHMAN YEAR			
Requirements	#Classes	Hours	Classes	<u>1st Semester</u>			JUNIOR YEAR
Religion Cornerstones				<u>5th Semester</u>			
Teachings and Doctrine of The Book of Mormon	1	2.0	REL A 275	First-year Writing or American Heritage	3.0	EC EN 330	4.0
Jesus Christ and the Everlasting Gospel	1	2.0	REL A 250	MATH 112	4.0	EC EN 340	4.0

Open Electives	Variable	Variable	personal choice	Total Hours	17.0	EC EN 476	3.0
FOR GE QUESTIONS CONTACT THE ADVISEMENT CENTER — FOR PROGRAM QUESTIONS SEE YOUR DEPARTMENT ADVISOR				<u>4th Semester</u>		Technical elective	4.0
*THESE CLASSES FILL BOTH UNIVERSITY CORE AND PROGRAM REQUIREMENTS (16–17 hours overlap)				EC EN 240	4.0	Technical elective	4.0
‡REDUCTION OF TOTAL CREDITS IS RECOMMENDED by choosing a Civilization 2 course that also double counts for the Arts requirement (if a separate Letters course is taken) or the Letters requirement (if a separate Arts course is taken). GCA might also double count with one of several University Core requirements. See the University Core list for specifics (core.byu.edu).				MATH 314	3.0	ENGL 312 or 316	3.0
Graduation Requirements:				MATH 334	3.0	Religion elective	2.0
Minimum residence hours required		30.0		University Core requirement	3.0	Total Hours	16.0
Minimum hours needed to graduate		120.0		Religion elective	2.0		
				Total Hours	15.0		
				*Actual course sequences should be adapted to individual needs. For example, students with AP credits in Math, Physics, or Computer Science will already have credit for some initial courses. Many students find it beneficial to attend one or more spring or summer terms. On average, students take about nine semesters to graduate in this program.			
				Note: Students are encouraged to complete an average of 16 credit hours each semester or 32 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.

Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical and computer engineering. Electrical and computer engineers have been primary contributors to the astonishing developments in communication, computer, and network technology. They have designed devices and systems that have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Smart phones, tablets, digital cameras, high definition television, solar power, microprocessors, lasers, unmanned air vehicles, medical imaging systems, and autonomous robotic systems are all examples of devices and systems designed by electrical and computer engineers. Innovations that flow out of electrical and computer engineering sustain the national economy and improve the quality of life for people throughout the world. In the future, society will look to electrical and computer engineers to address grand challenges ranging from sustainable and efficient energy to health care technologies and global communications networks.</p> <p>The Department of Electrical and Computer Engineering at Brigham Young University offers accredited degrees in Electrical Engineering</p>

BS in Electrical Engineering (393550)

2019-2020

and Computer Engineering.

Electrical Engineering focuses on microelectronics, electromagnetics, electronic circuits, wireless communications, signal processing, biomedical applications, photonics, and controls. Computer Engineering focuses on the design of digital computing devices and systems and involves hardware and software, operating systems, digital logic, real-time systems, and computer vision. Both programs combine fundamental principles with hands-on learning, including an innovative Junior Core experience that integrates classroom knowledge with project-based learning.

CO-OP AND INTERNSHIP EXPERIENCES:

Optional co-op and internship experiences with engineering firms throughout the USA are available. These experiences may extend over one semester plus the spring/summer terms, for a total of eight months.

PROFESSIONAL AND HONOR SOCIETIES:

The student chapter of the Institute of Electrical and Electronic Engineers is the professional organization; Eta Kappa Nu is the electrical and computer engineering honor society; and Tau Beta Pi is the honor society for all engineering fields.

CAREERS:

Electrical and computer engineers are among the most actively recruited students graduating from a four-year program. Baccalaureate engineers typically start their careers as members of project teams with one or more of the following responsibilities: designing digital, analog, or opto-electronic circuits; creating or testing applicationspecific software; testing components or systems; or providing technical support for sales. Later on, many engineers find themselves pursuing managerial careers, starting their own companies, or even managing entrepreneurial funds. Top graduates are also well received by medical schools, law schools, and professional and management programs.

The Electrical Engineering baccalaureate program is accredited by the Engineering Accreditation Commission of ABET, Inc., <http://www.abet.org>.
